March 2017 - June 2019

Paralegal

- Handled client communication, drafted and filed court documents, & conducted legal research

SOFTWARE PROJECTS

• Recipe Stash

<https://recipe-stash-1.herokuapp.com/>

Recipe Stash is a web app to store, filter, & categorize recipes, including a feature to upload images. Built with React, Node, Typescript, Material design, AWS S3, and PostgreSQL. For fun (and not because this is a good idea in general) I developed my own session-based user authentication service.

• Happy Balance

<https://happy-balance.herokuapp.com/>

Happy Balance is a straightforward web app for monitoring body weight; while the primary feature is weight history and graphing progress, it also includes feature for goal-setting to achieve a target weight. Built with React, Node, Chart.js, Material design, and Google Firebase (for both data storage and user authentication).

SKILLS

Programming Languages

Frameworks
