Languages: JavaScript, TypeScript, CSS, HTML

Frameworks & Libraries: Angular, React, Node.js

Testing Tools: Cypress, Jest, Playwright

Tools & Platforms: Git, Bitbucket, Jira, GitHub Actions, Nx, GitHub Copilot, Claude Code

WORK EXPERIENCE

Collibra | New York, NY (remote)

Senior Software Engineer

April 2026 – present

- Led technical delivery of a Proof of Concept to migrate a Rich Text Editor, resulting in a full migration and delivering a much improved rich text editor to customers
- Served as sole technical lead of a table component re-theming initiative, aligning one of Collibra's most data-intensive components with a custom design system, improving visual consistency across the entire UI
- Drove proactive dependency management across the frontend ecosystem, mitigating security vulnerabilities and preventing version lock

Software Engineer

October 2023 – April 2026

- Led a cross-team charting library evaluation, running a stakeholder workshop, building a proof of concept, and delivering a recommendation that became the standard charting solution across the application
- Collaborated with designers on building fully customized and reusable components, improving UI consistency across product teams
- Conducted research spikes, driving architectural decisions

Associate Software Engineer II

May 2022 – October 2023

- Developed a new Material-based application theme and shared component library that product teams across the organization migrated to

Traction Ag | Auburn, IN

Software Engineer

May 2020 – May 2022

- Built features for a greenfield Angular farm accounting application serving farmers of varying scale
- Collaborated directly with cross-functional stakeholders to translate complex agricultural accounting requirements into working software
- Worked in a fast-paced startup environment to iteratively deliver a product from early MVP through continued feature growth

Corsica Technologies | Fort Wayne, IN

Front End Developer

January 2020 – March 2020

- Implemented features on the company's primary React application and client-facing projects

United Art & Education | Fort Wayne, IN

Web Developer

June 2019 – January 2020

- Maintained the company intranet, Microsoft SQL Server database, and Magento e-commerce platform

EDUCATION

Ivy Tech Community College | Associate of Applied Science in Paralegal Studies, 2017
